Exam module: Functional Programming and Verification

- If you are feeling sick or otherwise unable to participate in the exam, notify the exam supervisor **before** the beginning of working time.
- Activate audio notifications for chat messages so you can react in case you are contacted by the exam supervisor.
- Activate your **webcam**.
- For **auxiliary material** you may only use a handwritten DINA4 cheatsheet (both sides), the lecture slides, blank sheets of paper plus a pen for notes and your IDE. You may also use a GUI frontend for git as well as an analog dictionary.
- Only the **BBB-room** for video surveillance and **Artemis** may be open in your browser. Using your browser to view PDF files is allowed as well.
- The exam will be visible on Artemis at **13:45**.
- The regular working time will be **14:00-16:00**.
- Submissions ahead of the deadline are only possible from **14:15 until 15:45**.
- If you want to submit before the regular working time, **first** submit the exam on artemis and **then** write a **personal message** to the exam supervisor. You may then leave the BBB room.
- Do not ask questions during the exam.
